## Profile

Full-stack Web Developer with a strong focus on back-end development using Java and Spring Framework. Adept at building secure and scalable web applications with a passion for streamlining the development process through build automation tools like Maven.

## Experience

**CONTRIBUTER | GIRLSSCRIPT SUMMER OF CODE | MAY 2024 - PRESENT**

- Collaborating closely with team members, while refining skills in Javascript, css,html and leveraging version control systems
- Engaging in regular communication, feedback exchange, and problem-solving to drive project success and foster community collaboration within the program

## Projects

### PERSONAL PORTFOLIO WEBSITE

Developed a personal website using HTML, CSS, and JavaScript to showcase portfolio and insights. Implemented modern design with smooth animations and responsive layout. Overcame challenges like cross-browser compatibility to deliver a polished, user-friendly experience. Future plans include expanding content and functionality.

### MUSIC WEBSITE

Created a music website. Designed with a focus on user experience and visual appeal, incorporating features like interactive music players and dynamic content loading. Ensured responsiveness across devices and browsers. Future plans include expanding music library and enhancing user engagement features
